Exercise 4 – Cleaning the Data

In this exercise we'll use the file you've created in exercise 3, and investigate it to clean the data.

Open the UsedCars2.csv file.

Complete the following tasks:

1. Load the csv file into a dataframe.
2. Use the dataframe function *summary* to view some statistics on the dataset.
3. How many cars have less than 10000 km?
4. How many cars have more than 500000 km?
5. How many cars are there from each model date?
